SUMMARY

Backend engineer building scalable, production-grade systems with Java/Spring Boot, PostgreSQL, and modern DevOps practices. Hands-on experience with REST API design, real-time communication, cryptographic protocols, and CI/CD automation. Proven track record shipping production systems at LogiCloud. 16+ open-source projects demonstrating expertise in full-stack backend development.

EXPERIENCE

LogiCloud Kft. – Software Engineer

May 2025 – Present

- Developed enterprise Spring Boot APIs with PostgreSQL/PostGIS geospatial optimization
- Architected backend coordination layer for Android and web client integration
- Implemented REST APIs serving 500+ daily requests with sub-100ms latency
- Automated deployment pipelines using GitHub Actions and Docker

PROJECTS

personalRedirect

Cloudflare Workers • D1 • Analytics

Production URL shortener with live analytics, visitor tracking (IP geolocation, ISP detection), admin dashboard, QR generation. 100+ monthly active users.

map.ballabotond.com

Astro • Mapbox • React • GeoJSON

Interactive geospatial mapping application with live tile rendering, polylabel positioning, responsive design. Demonstrates PostGIS integration.

Vortex

Kotlin • Android • Spring Boot

End-to-end encrypted messaging application with X25519/AES-256-GCM cryptography, real-time WebSocket synchronization, secure architecture.

Aether

Spring Boot • PostgreSQL • DevOps

Production backend tool actively deployed and used daily. Demonstrates real-world reliability, maintainability standards, and operational excellence.

TECHNICAL SKILLS

Languages & Frameworks

Java 17+, Spring Boot, Spring Data JPA, Hibernate, Node.js, React, TypeScript

Architecture & Protocols

REST APIs, WebSocket, TLS/SSL, X25519, AES-256-GCM, API Design, Microservices

Databases & Infrastructure

PostgreSQL, PostGIS, Docker, Linux, GitHub Actions, Maven, Git

Testing & DevOps

JUnit 5, Mockito, CI/CD pipelines, Docker containerization, Agile methodology

EDUCATION

BSc Computer Science
