

BALLA BOTOND

Junior Software Engineer

 github.com/bllbtnd  ballabotond.com  Esztergom, Hungary

SUMMARY

Software engineer with experience building and maintaining production systems using Java/Spring Boot, PostgreSQL, and Docker. Worked on REST API design, authentication and identity management with Keycloak, and CI/CD automation at LogiCloud. Comfortable with Linux server administration, self-hosted infrastructure, and backend development across different environments. Several public projects on GitHub.

EXPERIENCE

LogiCloud Kft. Software Engineer (Internship)

May 2025 – July 2025

- Integrated Keycloak across all company projects for centralized authentication and authorization
- Configured multi-tenant IAM flows with custom claims and role-based access control
- Developed enterprise Spring Boot APIs with PostgreSQL/PostGIS geospatial optimization
- Architected backend coordination layer for Android and web client integration
- Implemented REST APIs serving 500+ daily requests with sub-100ms latency
- Containerized and deployed services using Docker across development and production environments
- Retained by the company post-internship to provide ongoing technical support and contribute to projects as needed
- Built an independent factory product verification system handling QR code scanning, item validation, box assembly tracking, and automated barcode label printing

PROJECTS

personalRedirect

Cloudflare Workers • D1 • Analytics

Production URL shortener with live analytics, visitor tracking (IP geolocation, ISP detection), admin dashboard, QR generation. 100+ monthly active users.

map.ballabotond.com

Astro • Mapbox • React • GeoJSON

Interactive geospatial mapping application with live tile rendering, polylabel positioning, responsive design. Demonstrates PostGIS integration.

Vortex

Kotlin • Android • Spring Boot

University thesis project. End-to-end encrypted messaging application with X25519/AES-256-GCM cryptography, real-time WebSocket synchronization, secure architecture.

Aether

Spring Boot • PostgreSQL • DevOps

Production backend tool actively deployed and used daily. Demonstrates real-world reliability, maintainability standards, and operational excellence.

TECHNICAL SKILLS

Languages & Frameworks

Java 17+, Spring Boot, Spring Data JPA, Node.js, React, Angular, TypeScript, C, C++, C#

Architecture & Protocols

REST APIs, WebSocket, TLS/SSL, OAuth 2.0, OpenID Connect, Keycloak, X25519, AES-256-GCM, API Design, Microservices

Databases & Infrastructure

PostgreSQL, PostGIS, MySQL, SQLite, Docker, Docker Compose, Linux, Nginx, Cloudflare DNS, GitHub Actions, Git

Testing & DevOps

JUnit 5, Mockito, CI/CD pipelines, Docker containerization, Agile methodology

EDUCATION

BSc Computer Science

University of Pécs

Expected graduation: June 2026
